

- Recommended Instructions:**
1. Carry this in your purse or car.
 2. Have ready when you are examined by a physician, dentist, nurse or other health care professional.
 3. When they first approach you in your exam or hospital room, hand them a card and say 
 4. "Thank you for cleaning your hands"

CDC Facts:

- One in 20 hospital patients contract infections from caretakers, that's 2 million/yr and 103,000 of them die.
- Hospital acquired infections are the 4th leading cause of death.

Brenna Lawrence is believed to have contracted MRSA from a hospital. Brenna did not survive. She inspires us to encourage caretakers to clean their hands. 

We, at CleanYourHands.org, know that professionals are very aware of the importance of proper hand hygiene, and the expression of personal gratitude by patients will encourage better hand hygiene.

Thank you for cleaning your hands!
